STRATEGIES

C already there ◎ you can fill it in

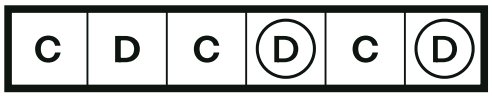

BLOCK THE PAIR

Two the same side by side? Both squares at the ends must be the other animal.

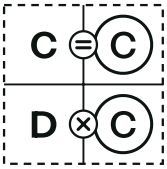

FILL THE GAP

Same animal, one square apart? The square between them must be the other animal.

THREE IS PLENTY

Three cats in a row? Every other square in that row is a dog. Same for dogs, and columns.

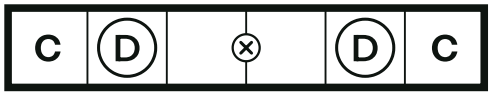

COPY AND FLIP

= copies the animal across. × flips it.

EQUALS BESIDE A LETTER

An = pair next to a cat can't be two cats (that would make three). So it's two dogs.

COUNT THE CROSS

A × pair holds one of each. Two cats elsewhere plus the pair's one makes three, so the rest are dogs.
